Subject: Microsoft Settlement

Under the Tunney Act, I want to comment on the proposed Microsoft settlement.

The PFJ supposedly forces Microsoft to publish its secret APIs, but the way it defines "API" is so narrow that there are many important APIs that MS would not have to publish.

Everything I've heard about the proposed settlement makes me think that it will make no difference to MS. They'll continue to play the same dirty tricks they always have, using loopholes like this one. Please settle this case in a way so that MS really does have to play fair in the future.

Thank you for your time.
